PROFESSIONAL SUMMARY

Cybersecurity and compliance professional transitioning into Governance, Risk, and Compliance (GRC), leveraging a strong foundation in healthcare regulations, Medicare compliance, data privacy, and customer support. Developing knowledge of risk identification, security controls, policy and compliance concepts, and the NIST Cybersecurity Framework while expanding technical skills through the Google Cybersecurity Certificate. Known for clear documentation and explaining complex processes in practical, understandable terms.

GRC & CYBERSECURITY SKILLS

- Governance, Risk & Compliance (GRC) Fundamentals
- HIPAA, CMS & Data Privacy
- Risk Identification & Assessment Concepts
- Security Controls & NIST CSF Fundamentals
- Policy / Procedure Adherence
- PII / PHI Handling & Confidentiality
- Documentation & Audit-Readiness Mindset
- Linux, SQL & Python Fundamentals
- SIEM / Log Analysis Concepts
- Complex Process Explanation & Stakeholder Support

CYBERSECURITY TRAINING & PRACTICE

- Completed guided coursework and practice activities involving Linux, SQL, Python, network security, logs, security controls, incident response, and risk concepts.
- Gained introductory exposure to SIEM, Wireshark, tcpdump, Suricata, IDS/IPS, vulnerability concepts, and security monitoring through cybersecurity coursework.
- Building a GRC-focused portfolio that connects cybersecurity fundamentals with healthcare compliance, data protection, risk awareness, and clear documentation.

TRANSFERABLE PROFESSIONAL EXPERIENCE

Customer Success Manager | Taylor Insurance Solutions **Remote**

- Handled sensitive healthcare information in HIPAA-regulated workflows while maintaining accurate records, confidentiality, documented procedures, and clear escalation paths.
- Supported account and workflow issues across Salesforce, Zendesk, and Freshdesk, translating complex requirements into clear guidance for nontechnical users.

Medicare Enrollment Specialist | GoHealth **Remote**

- Maintained accurate documentation and followed CMS/HIPAA requirements for sensitive data, enrollment workflows, verification, and escalation in a high-volume environment.
- Coordinated with internal teams to resolve exceptions and system discrepancies while maintaining clear case notes and process adherence.

Medicare Member Engagement Specialist | HealthIQ **Remote**

- Used CRM and ticketing tools to document interactions, track follow-up workflows, maintain data accuracy, and communicate regulated information clearly.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Google Cybersecurity Professional Certificate | 2026
- Licensed Health Insurance Producer, Accident & Health | Multi-State
